@tjaffri requested changes on this pull request.

Looks good so far. Please clean up the issues I identified and send an updated PR.

In [.travis.yml](#):

```
> @@ -0,0 +1,5 @@  
+sudo: false
```

Please remove this .travis.yml file from the PR. We will use circle CI for this project, not travis... and I will set that up shortly.

In [README.md](#):

```
> \ No newline at end of file  
+## Alexa
```

Please remove the comments from this file. The README should contain only information on how to build the project, how to run the tests, etc. See <https://github.com/tjaffri/alexa-skill-meezan/blob/master/README.md> for an example (ofcourse, you should change the contents to apply to this project)

In [src/AudioPlayer/AudioDirectiveFactory.js](#):

```
> @@ -0,0 +1,19 @@  
+import padStart from 'string.prototype.padstart';
```

Please remove this file from this PR. Protogo is not an audio streaming skill, so we don't need the audio directives here (you can delete the entire src/AudioPlayer/... folder).

In [src/AudioPlayer/AudioPlayerEventHandler.js](#):

```
> @@ -0,0 +1,49 @@  
+// to me this file seems pretty handy for the users control power on audioPlayerPlaybackStartedEvent
```

See earlier note, delete this file.

In [src/AudioPlayer/PlayHeadManager.js](#):

```
> @@ -0,0 +1,60 @@  
+import requestpromise from 'request-promise';
```

See earlier note, delete this file.

In [src/auth.js](#):

```
> @@ -0,0 +1,10 @@  
+import { say } from 'alexa-response';
```

Auth will not be implemented for this skill (i.e. we are not doing any account linking for this skill). So please delete this file.

In [src/intents/definations.json](#):

```
> @@ -0,0 +1,6 @@
+//Here will be inner call routs of the Client's APIs'
```

There is a typo in the name of this file, i.e. it should be definitions.json. Also, remove the comment.

In [src/intents/StaticIntents.js](#):

```
> @@ -0,0 +1,40 @@
+import { say, ask } from 'alexa-response';
+
+
+export async function aboutIntent() {
+  const aboutText = 'Protojo is an Alexa skill';
```

Typo in the name: Protojo

In [src/intents/StaticIntents.js](#):

```
> +
+export async function aboutIntent() {
+  const aboutText = 'Protojo is an Alexa skill';
+
+  return say(aboutText)
+    .build();
+}
+
+
+export async function helpIntent() {
+  let speechOutput = '';
+  speechOutput += 'Here are some things you can say: \n';
+  speechOutput += '- What hazards are in the world? \n';
+  speechOutput += '- How many hazards are you aware of? \n';
+  speechOutput += '- What would youu do if a haphazard situation like neuclear attack mashroom you see
from far far away \n';
```

Delete this line, please.

In [src/protogo.js](#):

```
> @@ -0,0 +1,89 @@
+import {annotation, Skill, Launch, Intent,SessionEnded } from 'alexa-annotations';
+import { say, ask } from 'alexa-response';
+import ssml from 'alexa-ssml-jsx';
+// intents made in staticIntents file :-)
```

Delete this line. It is obvious from the code what file you are pulling in the intents from, so the comment adds no value.

In [src/protogo.js](#):

```
> @@ -0,0 +1,89 @@
+import {annotation, Skill, Launch, Intent,SessionEnded } from 'alexa-annotations';
+import { say, ask } from 'alexa-response';
+import ssml from 'alexa-ssml-jsx';
+// intents made in staticIntents file :-)
+import { aboutIntent, launchIntent, helpIntent, stopIntent, notImplementedIntent } from
'./intents/StaticIntents';
+// the audio events
+import {
```

Once you delete the src/AudioPlayer folder all these imports should also go away. We are not implementing any audio directives for this skill.

In [src/protogo.js](#):

```
> +import { annotation, Skill, Launch, Intent, SessionEnded } from 'alexa-annotations';
+import { say, ask } from 'alexa-response';
+import ssm1 from 'alexa-ssml-jsx';
+// intents made in staticIntents file :-)
+import { aboutIntent, launchIntent, helpIntent, stopIntent, notImplementedIntent } from
'./intents/StaticIntents';
+// the audio events
+import {
+  audioPlayerPlaybackStartedEvent,
+  audioPlayerPlaybackPausedEvent,
+  audioPlayerPlaybackNearlyFinishedEvent,
+  audioPlayerPlaybackFinishedEvent,
+  audioPlayerPlaybackFailedEvent,
+} from './AudioPlayer/AudioPlayerEventHandler';
+
+//for user validity
+import validateUserSignedIn from './auth';
```

You won't need this either, so delete this line. We are not implementing account linking for this skill.

In [src/protogo.js](#):

```
> +
+@Skill
+export default class Protogo {
+
+  @Launch
+  launch() {
+    return say('Protogo launched!');
+  }
+
+  // The aboutIntent
+
+  @Intent('AboutIntent')
+  async about(_, event) {
+    return aboutIntent(event);
+  }
+}
+// the audio player launching Snippet
```

See earlier note, you don't need any of these audio player directives for this skill.

In [src/protogo.js](#):

```
> +
+const AudioPlayerEvent = annotation(
+  ({ request = {} }) => request.type && request.type.startsWith('AudioPlayer.'),
+  ({ request = {} }) => request.type
+);
+
+
+@Skill
+export default class Protogo {
+
+  @Launch
+  launch() {
+    return say('Protogo launched!');
+  }
+
+  // The aboutIntent
```

Remove these comments about each intent, since it is clear from the annotation which intent it is (the comment does not add value)

In [src/protogo.js](#):

```
> +     case 'AudioPlayer.PlaybackFinished':
+       return audioPlayerPlaybackFinishedEvent(event);
+     case 'AudioPlayer.PlaybackFailed':
+       return audioPlayerPlaybackFailedEvent(event);
+     default:
+       // If the event was not recognized, enter an empty response.
+       return new Response();
+   }
+ }
+
+ @Launch
+ async launch() {
+   return launchIntent();
+ }
+
+
+
```

Remove these empty lines, please... across the entire PR there should be only one line. If you run the linter (npm lint) I think it should warn or give you errors for all of these issues.

In [src/protogo.js](#):

```
> + @Launch
+ async launch() {
+   return launchIntent();
+ }
+
+
+
+
+ @Intent('hello')
+ hello({ name = 'world' }) {
+   return say(`Hello ${name}`).card({ title: 'Protogo', content: `Hello ${name}` });
+ }
+
+ @Intent('AMAZON.HelpIntent')
+ async help() {
+   //loading mine very own help intent
```

Indentation here looks off, and also please remove the comment. It is clear from the code what intent you are loading... add comments only when you need to document something not obvious from the code.

In [src/protogo.js](#):

```
> +   return say(`Hello ${name}`).card({ title: 'Protogo', content: `Hello ${name}` });
+ }
+
+ @Intent('AMAZON.HelpIntent')
+ async help() {
+   //loading mine very own help intent
+   return helpIntent();
+ }
+
+
+ @Intent('AMAZON.ResumeIntent', 'AMAZON.PauseIntent')
+ async notImplemented() {
+   return notImplementedIntent();
+ }
+
+
+ @SessionEnded
```

Indentation looks off here. Please clean up (the linter should help find all such issues)

In [test/helpers/getTestAccessToken.js](#):

```
> @@ -0,0 +1,40 @@
+
```

Remove this file. Since we are not using Auth0 (or any auth as a matter of fact) for this skill, you don't need test access tokens for the test automation.

In [test/staticIntents/aboutIntent-test.js](#):

```
> @@ -0,0 +1,22 @@
+import test from 'ava';
+import Request from 'alexa-request';
+import Skill from '../src/index';
+
+test('AboutIntent', t => {
+  const event = Request.intent('AboutIntent').build();
+
+  return Skill(event).then(response => {
+
+    const expectedText = 'Protojo is a skill for Amazon Alexa';
```

When you fix the typo in the code, you will need to fix the typo here as well.

+{
```

Please update this file to match: <https://github.com/tjaffri/alexa-skill-meezan/blob/master/.eslintrc.json>. You will also need to make sure the package.json file contains the right eslint plugins, refer to the devdependencies section of <https://github.com/tjaffri/alexa-skill-meezan/blob/master/package.json> (specifically all the eslint-config-... dependencies).

Make sure to run the linter and fix all the issues reported by it with you update this PR.

Some missing files:

1. You are missing a .gitattributes file. Grab the one from here: <https://github.com/tjaffri/alexa-skill-meezan/blob/master/.gitattributes>
2. You are also missing a .editorconfig file. Grab the one from here: <https://github.com/tjaffri/alexa-skill-meezan/blob/master/.editorconfig>. I use vscode and that respects the editor config settings if you have the right plugin installed: <https://marketplace.visualstudio.com/items?itemName=EditorConfig.EditorConfig>. You can use whatever IDE you want but please make sure you pick one that supports editorconfig so we can remain consistent across developers.
